1. NATURE OF OPERATIONS AND GOING CONCERN

Greenland Resources Inc. (the "Company") was incorporated under the laws of the Province of Ontario by articles of incorporation dated February 7, 2008. The Company is now engaged in the acquisition, exploration, and development of mineral properties in Greenland. The Company owns a 100% interest in the Malmbjerg Molybdenum Project, an exploration project located in Greenland. The Company's registered office is at 110 Yonge Street, Toronto, Ontario M5C 1T4.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of operations on such properties, these procedures do not guarantee the Company's title. Property title may be adversely affected by a number of unforeseeable factors, including government licensing requirements or regulations, social and political licensing requirements, unregistered prior agreements, unregistered claims, and non-compliance with regulatory and environmental requirements.

The Company is at an early stage of exploration and as is common with many exploration companies, it raises financing for its exploration and acquisition activities. The business of exploring for minerals involves a high degree of risk and there can be no assurance that future exploration and development programs will result in profitable mining operations. The Company's continued existence is dependent upon the preservation of its interest in the underlying properties.

The Company's ability to continue as a going concern in the longer term is dependent upon its ability to obtain additional financing. There is no assurance that the Company will be successful in achieving these objectives. These financial statements do not include the adjustments that would be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

These consolidated financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assumes the realization of assets and discharge of liabilities in the normal course of business.

These financial statements were approved by the Board of Directors on February 16, 2026.

2. BASIS OF PREPARATION

Statement of compliance

The Company applies International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations issued by the International Financial Reporting Interpretations Committee ("IFRIC"). These condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting (IAS34). Accordingly, they do not include all of the information required for full annual financial statements by IFRS as issued by IASB and interpretations issued by IFRIC.

The policies applied in these unaudited condensed interim financial statements are based on IFRSs issued and outstanding as of February 16, 2026, the date the Board of Directors approved the statements. The same accounting policies and methods of computation are followed in these consolidated financial statements

2. BASIS OF PREPARATION (Continued)

as in the most recent annual financial statements as at and for the year ended March 31, 2025. Any subsequent changes to IFRS that may be given effect in the Company's annual financial statements for the year ending March 31, 2026, could result in restatement of these unaudited condensed interim financial statements.

The policies have been consistently applied to all periods presented unless otherwise noted.

Basis of measurement

These consolidated financial statements are prepared on the historical cost basis, except for certain financial instruments that are carried at fair value. In addition, these consolidated financial statements are prepared using the accrual basis of accounting except for cash flow information. These consolidated financial statements are presented in Canadian dollars, which is the functional currency of the Company and its subsidiary.

Principles of consolidation

These financial statements include the accounts of the Company and its wholly owned subsidiary, Greenland Resources A/S. Intra-group balances and transactions are eliminated in preparing the condensed consolidated interim financial statements

Subsidiaries consist of entities over which the Company is exposed to, or has rights to, variable returns as well as the ability to affect those returns through the power to direct the relevant activities of the entity. Subsidiaries are fully consolidated from the date control is transferred to the Company and are de-consolidated from the date such control ceases. The financial statements include all the assets, liabilities, revenues, expenses and cash flows of the Company and its subsidiaries after eliminating inter-entity balances and transactions.

3. RELATED PARTY TRANSACTIONS

Related parties include the Board of Directors, close family members and enterprises that are controlled by these individuals as well as certain persons performing similar functions. In accordance with IAS 24, key management personnel are those having authority and responsibility for planning, directing and controlling the activities of the Company, directly or indirectly, including any directors (executive and non-executive) of the Company. The following table shows the compensation paid to key management personnel.

Principal Position	Fiscal Period (Q1-Q3)	Consulting fees (management) (\$)	Stock-based compensation (\$)	Consulting fees (other) (\$)	Total compensation (\$)
Officers	2026	878,865	-	-	878,865

	<u>1,188,389</u>	<u>769,341</u>

6. FINANCIAL INSTRUMENTS

Fair Value

IFRS requires that the Company disclose information about the fair value of its financial assets and liabilities. Fair value estimates are made at the reporting date based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties in significant matters of judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect these estimates. The carrying values of cash, advances, sundry receivables and accounts payable and accrued liabilities approximate their fair values due to their short-term nature.

6. FINANCIAL INSTRUMENTS (Continued)

Risk Factors

The Company's risk exposures and the impact on the Company's financial instruments are summarized below. There have been no changes in the risks, objectives, policies and procedures from the previous period.

Liquidity Risk:

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at December 31, 2025, the Company had a cash and cash equivalents balance of \$11,840,368 (March 31, 2025 - \$1,827,842) to settle current liabilities of \$548,915 (March 31, 2025 - \$579,214). All of the Company's accounts payable and accrued liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

Interest Rate Risk:

The Company has cash balances and no interest-bearing debt. The Company's current policy is to invest excess cash in money market funds and investment-grade short-term deposit certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks.

Credit Risk:

The Company's credit risk is primarily attributable to sundry receivables and expense advances. Included in sundry receivables is sales tax due from the Federal Government of Canada. From time to time the Company makes advances to certain of its personnel and suppliers to expedite work that requires them lay out funds for significant expenses that are reimbursable. These funds are either accounted for with receipts or returned. The Company has no significant concentration of credit risk arising from operations. Management believes that the credit risk concentration with respect to these financial instruments included in sundry receivables and advances is remote.

Foreign Exchange Risk:

The Company's functional and reporting currency is the Canadian dollar and purchases of goods and services have generally been transacted in Canadian dollars. The Company funds certain operations, exploration and administrative expenses on a cash basis in Danish Krone (DKK) or other currencies either converted from its Canadian dollar bank accounts held in Canada or from its Danish Krone bank account held in Greenland. Management believes the foreign exchange risk derived from currency conversions is, for the foreseeable future, negligible and therefore does not hedge its foreign exchange risk. As at December 31, 2025, the Company's cash balances were held primarily in Canadian dollars. From time to time, certain suppliers to the Company's exploration program require deposits or advances that are denominated in DKK or USD. Historically the deposit amounts were all applied against bills, or refunded if unused, over relatively short time frames which made the exchange fluctuation effects immaterial in these stable currencies.

Price Risk:

Prices of goods and services consumed in the course of the Company's activity can fluctuate in response to supply and demand and are often driven by industry cycles. Fluctuations in commodity prices may influence financial markets and may indirectly affect the Company's ability to raise capital to fund exploration. If they vary materially from forecasts made when budgets are set it could affect the ability of the Company to complete work programs. Generally, the Company's planning time horizons are short enough that this does not present a significant risk.

Sensitivity Analysis:

Sensitivity to a 1 percentage point change in interest rates, based on the balance of cash as at December 31, 2025, would result in a change in interest income of approximately \$11,840 (March 31, 2025 - \$18,278) if held over a twelve-month period.

7. CAPITAL MANAGEMENT

The Company considers its capital structure to consist of capital stock, warrant and stock option reserves and accumulated deficit. The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to fund its exploration activities. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The projects in which the Company currently has an interest are in the exploration stage. As such the Company is dependent on external financing to fund its activities. In order to carry out the planned exploration programs and pay for administrative costs, the Company will spend its existing working capital and raise additional amounts as needed.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. The Company is not subject to externally imposed capital requirements. There were no changes in the Company's approach to capital management during the nine months ended December 31, 2025, or the year ended March 31, 2025.

8. COMMITMENTS AND CONTINGENCIES

Environmental contingencies

The Company's exploration and evaluation activities are subject to various international and federal laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive and thus more difficult to comply with. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

Management contracts

The Company is party to certain employment contracts. The minimum amount due in one year pursuant to these contracts is \$370,000. These contracts require that additional payments of approximately \$1,100,000 be made upon occurrence of a change of control. As a triggering event has not taken place, the contingent payments have not been reflected in these consolidated financial statements

9. SEGMENTED INFORMATION

The Company's operations consist of the acquisition, exploration and development of mineral properties. During the nine months ended December 31, 2025, and the year ended March 31, 2024, substantially all of the Company's assets and operations related to the acquisition, exploration and development of resource properties were held in Canada. Its sole mineral exploitation property was located in Greenland.
